

St Peter's School
3-18YORK

Public Lecture
The Quantum Universe

Professor Jeff Forshaw

Manchester University

Tuesday 9 June 2015

7.00pm Memorial Hall

Professor Forshaw will examine quantum physics. Underpinning most of modern physics; quantum physics describes a very strange and counter-intuitive world, where tiny particles act as if they are in several places at the same time. Professor Forshaw will present the crazy rules that control the behaviour of a quantum particle and show how they impact upon questions about the world around us.

Admission is free, but tickets are required. Light refreshments provided. Tickets available from stpetersyork.eventbrite.co.uk. For enquiries phone 01904 527300
